TECHNOLOGY

## Your partner in development

Logic Technology is the logical choice. As Europe's market leader, we are your partner for end-to-end solutions in the field of embedded software, development and test tools. Through many years of experience we have developed a wide-ranging spectrum of expertise and best-of-breed selection of high-performance products. We always come up with the right answer to your question: **There's always a Logic solution!**

From the very start of our company in 1993, Logic Technology has acquired a substantial amount of knowledge and experience as a professional partner in the development of innovative products and concepts. Our company currently sets the tone in the dynamic embedded design and test market in Europe. Despite our continual high-paced growth and development, we still manage to stay close to the customer through our team of expert engineers and customer-oriented front and back office support staff at our locations in the Netherlands and Germany.

***We speak your language!***

### Unique combination

Logic Technology's strength lies in our unique combination of staff, products and services. Our engineers are on top of the latest developments in the embedded market and have extensive experience with state-of-the-art technologies. It is their mission and mandate to provide you with first class advice and the necessary follow-up. After a quick but thorough analysis of the problem, they come up with the right product, technical support, custom advice or a training programme for you.

***Quick and to the point!***

### Logic Technology, your professional partner in:

- embedded software
- development tools
  - analyzers and test tools
  - technical courses
    - interconnect solutions
    - consultancy

### Cooperation with top suppliers

Logic Technology cooperates with a number of carefully selected and renown embedded software and tool specialists. This means you will always have a range of reliable, top products within reach.

Our portfolio includes leading manufacturers who make major contributions to universally-recognized special interest groups and standardization committees. Several of them cooperate with major semiconductor manufacturers by supplying or advising on Debug-IP for their silicon. Logic Technology continually strives to provide the absolute highest level of quality and reliability. ***A lasting relationship!***

### Expert sparring partner

With Logic Technology you take on board a fund of forceful thinking. From the obvious challenges in the concept phase, the unexplainable bugs in the design, until the pain staking test cycle and start of production, we are your professional sparring partner! We save you valuable time, risks and resources by providing sound advice on the right tools and software. With our help you will save on time to market and increase the return on investment. In this way Logic Technology makes a quality contribution to your successful development from the very outset. ***For a good start!***

### Innovative

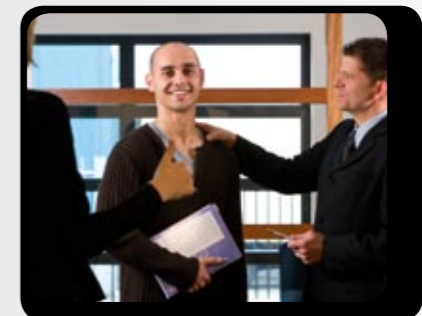

Logic Technology continues to invest in innovation and new solutions. Working in close cooperation with our suppliers, we act on signals from the market to come up with product alterations or new tools.

A number of leading chip manufacturers have intentionally chosen Logic Technology as a partner in their solution-oriented ecosystem. Our deep understanding of their innovative technologies and roadmaps means we can offer you the appropriate tools and software at the right moment. This always results in a customized solution to fill your specific project requirements. ***Always one step ahead!***

### Reliable

In the dynamic environment in which Logic Technology operates, one factor remains constant: customer satisfaction! We respond promptly to all your technical questions and are your partner right through to the end of your project, from the initial consultation to the project follow-up stage. Our experienced team of professionals always goes the extra mile in working together with you to solve even the most complex challenges.

***Success guaranteed!***
